

How to complete each dragon:

Build A Dragon Game

Number of players: 2 - 6

Contents: 1 x Wooden coloured dice, 6 x coloured tokens and
36 x dragon puzzle pieces

Objective: Roll the dice to collect coloured dragon puzzle pieces. The winner is the first player to collect all pieces of one colour to build their dragon.

How to Play: Mix up all the dragon pieces into a pile. To start, each player chooses the colour of the dragon they want to build by picking one of the coloured tokens. Starting with the youngest player, take turns rolling the dice - if you roll your chosen colour pick up a piece of your coloured dragon from the pile. If you don't get your colour, it's the next player's turn. Pass the dice to your right and continue to take turns rolling, collecting pieces of your dragon until you have all 6 pieces and the dragon is complete. If you are playing with two players, you can choose up to three dragons to build each.
